Health and Safety at Stars

Safety is of utmost importance to Boys & Girls Clubs of the Valley. Here are some key precautions and modifications happening for this year's event. For the full Safety Event Operations Plan, go to **BGCAZ.org/stars**.

UPON ARRIVAL

Guests will maintain the appropriate distance between one another as they self-park and walk from the lot into the stadium. Guests will continue social distancing of 6' or greater through the concourse, down the escalator, through the tunnel, and onto the stadium floor until they reach their pod and table.

Guests will find hand sanitizing stations throughout the event space and guests will receive small bottles of hand sanitizer on their guest table. For your safety, crowded check-in areas, silent auction clusters, and end of evening check-out have been eliminated.

DURING EVENT

Our event team has designed "pods" that measure 25' x 25' for the enjoyment of each party. Signage will be placed throughout the event space reminding guests to practice social distancing and to wear masks while standing or walking to/from their table. All guests will primarily be within their pod boundaries unless they are entering/leaving the event space.

ASM Global will continuously sanitize various surfaces to include handles, escalator rails, elevator buttons, restrooms, etc.

AFTER EVENT

Guests will leave the stadium through the same gate in which they arrived.

Early entrance/exit accommodations will be made for any quest needing extra time or space.

All events at State Farm Stadium are in compliance with the most current regulations and mandates put forth by Arizona health and government officials. As government regulations are revised, State Farm Stadium will adjust stadium policies and procedures accordingly.

Multiple tables placed in a 25' x 25' pod will take the place of traditional ballroom seating. Table configuration is based on individual needs and desires and all guest/couples will be seated at least 6' apart from other guests.
